KAUKAUNA LOCKS AND DAM, LOCK SHELTER AT LOCK 5

HAER NO. WI-87-Q

HAER
WIS
44-KAUK,
3 Q -

Location: The Lock Shelter at Kaukauna Lock 5 is located along the north side of the lock in French Lot PC 33, T21N, R19E, Civil Town of Vandenbroek, Outagamie County, Wisconsin.

UTM: 16/400560/4904260; USGS Quadrangle: Kaukauna, Wisconsin 7.5' series

Date of Construction: 1917

Engineer: United States Army Corps of Engineers with Contractors

Architect: United States Army Corps of Engineers with Contractors

Present Owner: United States Army Corps of Engineers

Present Use: Office for lock personnel.

Significance: The lock shelter provides shelter for the lockkeeper while on active duty. Further, the lock shelter provides office space and first aid facilities for office personnel. As such the lock shelter functions as part of the daily operation of the Kaukauna Locks and Dam Complex.

Project Information: This documentation was undertaken in 1995 in accordance with requirements detailed in a June 19, 1994 letter from Gregory D. Kendrick, Chief, History Branch, NPS to Dale Monteith, Acting Chief, Planning Division, USACOE, Detroit District. The Lower Fox system remains basically operational but was placed in caretaker status by the USACOE in 1982. The USACOE plans to divest itself of the Lower Fox system as soon as is feasible; therefore, NPS requested this documentation. The Lower Fox system remains basically operational but was placed in caretaker status by the USACOE in 1982. The USACOE plans to divest itself of the Lower Fox system as soon as is feasible; therefore, NPS requested this documentation. All documentation conforms to HAER standards.

Dr. John D. Richards, Principal Investigator; Georgia A. Lusk, Patricia B. Richards, and Robert J. Watson, Project Archivists with Great Lakes Archaeological Research Center, Inc.; Joseph Paskus, Project Photographer.

LOCK SHELTER

Built circa 1917, the Kaukauna Lock 5 lock shelter is a single story, front gabled frame shed used as a locktender's station. It is 12 feet 5 inches wide and 14 feet 5 inches long. It has been relocated to a concrete house foundation built into the lock embankment. Clad with drop siding and roofed with reddish-colored asphalt shingles, it has walls accented by plain vertical trim. The roof has plain gable cornices. A metal smokestack protrudes from the upstream roof slope. The walls are gray with white trim.¹
